Vitamin A (Min)..... 5 IU/lb.

#### Ingredients

Cane Molasses, Cottonseed Meal, Defluorinated Phosphate, Magnesium Oxide, Salt, Vitamin A Supplement, Vitamin D-3 Supplement, Vitamin E Supplement, Ferrous Carbonate, Manganous Oxide, Calcium Carbonate, Zinc Oxide, Calcium Iodate, Copper Oxide, Cobalt Carbonate and Sodium Selenite.

#### IMPORTANT:

Consumption of this block will vary depending upon the condition of the animals, quality and quantity of forages being fed, seasonal weather conditions and, most importantly, the feeding location of the blocks with respect to loafing, grazing, feeding and watering areas.

#### INTRODUCTION PERIOD:

During the first week of use, please the blocks approximately 50-75 feet from loafing and/or watering areas. As cattle become acclimated to the presence of the blocks, some repositioning may be necessary to achieve proper consumption. Move blocks closer to increase consumption; further away to decrease consumption. **DO NOT PROVIDE STARVED CATTLE FREE ACCESS TO THIS BLOCK.**

#### IMPORTANT:

If over consumption occurs for more than two weeks and repositioning of the blocks does not correct the situation, remove blocks and evaluate overall feeding program.

**CAUTION: USE AS DIRECTED.** Consumption of selenium should not exceed 3 mg per head per day.

#### Feeding and Management

1. Feed one block per 20 head of cattle (Timid and smaller animals need their share).
2. Place the blocks where animals congregate (loafing, grazing, feeding and watering areas).
3. Feed blocks continuously along with plentiful sources of good quality forage and clean, fresh water.
4. Cattle will consume 1 pound per head daily based upon a 1,000-pound animal. One (1) pound of this product will supply 3 mg of supplemental selenium and 20.4 g of supplemental magnesium.
5. If additional mineral and vitamin fortification is desired, feed a SWEETLIX mineral-vitamin supplement containing salt in addition to this block.
