STIMU-LYX[®]

SOUTHEASTERN BRANDED SUPPLEMENT

The low moisture process was developed over 30 years ago to offer livestock owners a superior product when it came to supplementing standing and harvested forages. This process removes over 96% of the moisture from the product, leaving the producer with 100% nutrition. What you will find when using STIMU-LYX[®] is a product that uses the highest quality ingredients to provide supplemental protein, and energy, along with minerals and vitamins in a palatable form for increased fiber digestion, that livestock love and producers rely on to meet the daily nutritional needs of their livestock.

STIMU-LYX[®]
