Manufactured By

ALABAMA FARMERS COOPERATIVE, INC.

Decatur, Alabama 35601

### **Feeding Directions:**

AFC 32% Sinking Fish Feed is a 100% nutritionally complete formula which supplies all the protein, energy, fat, vitamins, and minerals required by catfish from 6 inches in length to market size. Sinking formulation allows feeding during cool weather as well as feeding in areas where other animals such as ducks might have access to the product. This high energy level in this feed will allow for fast efficient gains. The product is very palatable minimizing feed waste and water quality problems. This product is also coated with highly digestible fish oil increasing palatability and digestibility even more. This is an extruded product that will increase nutrient availability to your fish. Feed once daily, either early morning or late afternoon. Feed from the same location each day. Feed at the rate of 2 to 3% of the body weight of the fish each day. Do not overfeed.

### **Important Management Practices:**

Do not allow feed to become wet or moldy. When changing feeds, allow a 5 to 7 day transition period. Feeding in any manner other than directed can lead to nutritional disorders. Consult an Animal Nutritionist before feeding this product in a manner other than directed.
