Decatur, Alabama 35601

Feeding Directions:

Johnsons Emu Breeder is specifically formulated with egg production in mind. Extra protein levels will replace that lost during egg production. Extra fat will ensure proper body condition through this process. This feed also contains extra trace minerals needed for optimum production. This feed contains all the nutrients needed from day one until the final day off the season for superior egg production. No other supplements is needed with this feed. Breeder should be offered approximately one month prior to and one month following the production season. Do not feed this product to a bird in any other stage of production.

Important Management Practices:

Always provide a source of fresh, clean water, Do not allow feed to become wet or moldy. Always keep feeders and waterers clean. When changing feeds, allow a 5 to 7 day transition period. Feeding in any manner other than directed can lead to nutritional disorders. Consult an Animal Nutritionist before feeding this product in a manner other than directed.
