

## **HORIZON CHAMPIONS CHOICE FEEDING DIRECTIONS:**

**Horizon Champions Choice 12%-** all natural, 12% protein, palatable pelleted feed formulated for pasture and pleasure horses. This feed provides supplemental energy, protein, minerals and vitamins to help meet the horse's daily requirements. Champions Choice 12% is manufactured in a pelleted form for those who prefer a pelleted horse feed. It is designed to supplement horses consuming average to good quality forages. Champions Choice 12% should be fed at a rate of 1 lb. per 100 pounds of total body weight. Individual horse differences may require a feeding rate adjustment of plus or minus 10% of amount indicated and can be determined by evaluating the body condition of the horse

**Horizon Champions Choice 14%-** all natural 14% protein, highly palatable pelleted horse feed designed for active horses consuming average quality forages. This feed contains quality ingredients such as Corn, Soybean Meal, and Alfalfa Meal along with a complete source minerals and vitamins. Horizon Champions Choice 14% provides the proper balance of energy, protein, minerals, and vitamins to meet the nutritional needs of the active horse. This feed also contains natural electrolytes such as Potassium and Sodium to replace those lost by the horse during heavy activity. Feed to active horses at a rate of .5 to 1 lbs. per 100 pounds of body weight. Individual horse differences may require a feeding rate adjustment of plus or minus 10% of amount indicated, and can be determined by evaluating the body condition of the horse

**Horizon Champions Choice 16%-** all natural 16%, highly palatable, premium pelleted horse feed that can be fed to lactating mares and foals. Champions Choice 16% is a versatile feed balanced for the nutritional needs of both the mare and foal in a palatable, pelleted form to ensure optimum feed intake. This feed can be fed to both bred and lactating mares to provide quality nutrition for milk production and maintaining body condition. This feed can also be fed as a creep feed to colts assuring proper nutrition to achieve optimum growth and development. Horizon Champions Choice 16% also provides the proper balance of amino acids (building blocks for protein) for greater muscle development and energy levels to assure reproductive performance. This feed also contains elevated Biotin levels for hoof health and Vitamin E levels to promote immune response during times of stress. Horizon Champions Choice 16% contains chelated minerals for greater mineral absorption and utilization along with yeast microbial to aid in digestion. Feed at a rate of .5 to 1.5 lbs. per 100 pounds of body weight based upon reproductive status of the mare. Individual horse differences may require a feeding rate adjustment of plus or minus 10% of amount indicated and can be determined by evaluating the body condition of the horse.

**Horizon Champions Choice 32% Concentrate.** All natural 32% pelleted concentrate that must be mixed with grains to provide a 12%, 14%, or 16% complete feed. This concentrate will also provide adequate levels of minerals and vitamins to meet the daily needs of the horse. This concentrate can be used to make a complete feed for all stages of horse production, but should never be fed as a sole feed. Mixing directions are as follows:

	<b>12% feed</b>	<b>14% feed</b>	<b>16% feed</b>
<b>Corn</b>	30%	20%	10%
<b>Oats</b>	60%	65%	70%
<b>Horizon Champions Choice 32%</b>	10%	15%	20%

**Important Management Practices:**

When making changes in the animal's diet, do so gradually, planning for a 7 to 10 day transition period for the horse. Do not feed if wet or moldy. Do not allow feed to stay in feeder for a period of longer than 3 days. Keep feed in a clean container free from insects and rodents. Provide ample feeder space for horse. Provide adequate forage and clean water on a daily basis. Poorly managed feeding programs can lead to nutritional disorders. Before making drastic changes to an animals diet, contact an Animal Nutritionist.
