Feeding Directions

TP Cattle Rations is an all natural protein feed containing grain products, Plant protein products, forage products with added minerals and vitamins. It is designed to supplement all classes of cattle consuming average to good quality pasture or stored forage. It contains macro minerals, including calcium, phosphorus, trace minerals and vitamins AD & E. This product is excellent for starting cattle on feed or before changing to a more dense grain ration or finishing feed. When changing an animals diet allow 7 to 10 days transition period. Do not feed moldy feed to livestock. Poorly managed feeding programs can increase the possibility of digestive disorders. Always provide fresh clean water and free choice mineral when feeding cattle.
